EXPERIENCE

WEB DEVELOPER

Freelance | 2017-present

- Using HTML, CSS, JAVASCRIPT, I've designed multiple websites and web apps as well as deploying them
- Designed and managed SQL database
- With Node.js, I've written a handful of Rest APIs, payment gateways and some time based webapps.
- Designed and developed an automatic controlled lighting system using C language to improve the efficiency and efficient use of energy in a particular area.
- I worked in a team of front end and back end developers, to develop a time based chat app using React, NodeJs, SQL, and socket.io

SOFTWARE DEVELOPER

Digit plus international | 2015-2016

- Developed a virtual classroom platform using sakai development environment software which helps in facilitating smooth class activities even while the school is under closure due to industrial action
- Developed an arithmetic calculations program based system using C++, to improve the efficiency of students in solving mathematical problems and as well minimizing time wastage
- Modified and testing order processing system using C++.
- Designed graphic fliers for company publicity using Adobe Photoshop software
